

# How to flash a computer with Linux 13 Image

You will need a Windows computer and 2 USB sticks, >= 8GB, preferable USB 3.0 or 3.2

Download Rufus for Windows to your computer.

[Rufus - Create bootable USB drives the easy way](#)

Download the Debian 13 VAPlayer image from

<https://install.visualart.se/linux/VAPlayerusb.iso.zip>

Unpack the .zip file to your computer

Insert an USB stick, min size 16GB in your computer

Start Rufus program and select

Device = Your USB stick

Disk or ISO = VAplayerusb.iso

Start the process and select Yes on all questions

When process is done go to the target computer

Insert USB stick

When booting up press F12 or F10 to enter boot menu

Select to boot from USB

When process is done the computer will reboot

Remove the USB stick and move to next computer
